

## Wildfire Attack & Suppression Mobile Foam Module

The Wildfire Attack & Suppression Mobile Foam Module is designed for rapid attack/first on scene wilderness fire fighting. Contained in a rugged cage slung from beneath an attack helicopter, or mounted on a vehicle, the mobile foam module has remarkable first on scene fire fighting capability. Each mobile foam module contains an MFU 50-150, a 650-litre water tank, 2 Vario 13 backpack units and a high-volume water pump and hose.

### MFU 50-150 Premium

The MFU 50-150 water/foam fire fighting system is a fully self-contained, high pressure Mobile Foam Unit with outstanding versatility and is highly effective in its performance. Single person operation with a turn of a key and a push of a button, the MFU is ready for work in seconds. With its 30-metre hose, 30-metre throw range and remote-control option, the MFU 50-150 can adapt to most fire situations fast and efficiently. The MFU 50-150 can be mounted on most vehicles or trailers, various water tank sizes are available to suit the user's requirements.

**Vario Carbon Ultralight** foam fire extinguisher systems are available in 9 and 13 ltr. capacity. With a range of more than 20-metres, firefighters can attack fires with a high level of accuracy from a greater and safer distance. With its comfortable carry handle or optional ergonomic backpack allows for a more efficient control over small and medium sized fires. This compact and hi performance system effectively handles most fire situations with ease. The Vario series foam extinguishers are field refillable in under 2 minutes with no tools or special equipment.

**High Volume Water Pump:** Self-contained high-volume water pump with quiet-running gasoline engine and automatic centrifugal clutch. With electric starter and automatic speed limit during suction. Automatic control of output pressure. The illuminated multifunction panel provides intuitive control.
